

Paolo Pontarollo

Full Stack developer

Code with precision, design with purpose, grow through collaboration.

Work experience

Full Stack Developer — 4HSE Verona, VR, Italy

Since September 2024

4HSE is a company that provides a cloud-based software platform for managing workplace health and safety (HSE). The backend is developed in PHP (Yii2 framework) and the frontend uses JavaScript, based on a custom framework designed for building dynamic interfaces.

My responsibilities include implementing new features to further improve the user experience, developing specific APIs based on client requests, writing tests, and fixing bugs.

Volleyball Coach — Bassano Volley Bassano del Grappa, VI - IT

Since September 2019

Volley has been my biggest passion since I was a kid, so becoming a coach I want to pass on the spark I have for this amazing sport.

Tech lead — Neosperience Spa Bassano del Grappa, VI - IT

From October 2023 to September 2024

With the increase in the workload and the growth of staff, my position evolved to a role of coordination and supervision of the development teams. This phase allowed me to consolidate my management and analysis skills, while still actively developing the platform core.

Full Stack developer — NeoSperience - Workup, a Neosperience Company Bassano del Grappa, VI - IT

From March 2021 to September 2022

With the acquisition of Workup by Neosperience, a great opportunity for growth presented itself again. With a complete overhaul of the development stack, the internal framework is being reworked with cutting-edge technologies such as NuxtJs, TailwindCSS and a headless backend (keeping Laravel as a foundation). My position varies in both backend and frontend R&D development, while also supporting the development of customer websites.

Backend developer — Eurostep Montebelluna, TV - IT

Since October 2020

We started developing a platform to link services used in clients e-commerce websites (billing, privacy, store management and many more). This platform is based on Laravel and uses VueJS to show data in the frontend pages.

Work experience

Research and development — [Workup](#) Bassano del Grappa, VI - IT

From January 2017 to September 2019

After my internship finished I started working in the R&D team. We developed a custom CMS using Laravel framework (PHP) capable of delivering the most complex e-commerce websites.

The project is completely modular and has a large amount of integrations with external services that can improve even more performances (e.g. Algolia, AWS products).

The frontend was initially written using mainly JQuery, but dynamic pages were too complicated to maintain and customize for every client so we switched to VueJS. Laravel also delivers an integration with Webpack so the transition was easier than expected.

Software developer (internship) — [Workup](#) Bassano del Grappa, VI - IT

From July 2016 to December 2016

I had a six months internship in which I developed multiple plugins for their team management software - Atlassian Jira. These plugins were written in Java for the backend and Javascript for the frontend.

Web developer (internship) — [AccentSoftware](#) Abergele - Wales

September 2012

Development of a web application to browse internal documents using HTML, JS (JQuery), PHP, MySQL

Research and development (internship) — [Apromix S.r.l.](#) Bassano del Grappa, VI - IT

From May 2012 to June 2012

Research and development for embedded terminals based on Linux. Custom software development using QT framework (C++)

Education

IT technical institute — [I.T.I.S E. Fermi](#) Bassano del Grappa, VI - IT

From September 2008 to July 2013

High school diploma with specialization in computer science.

Attending this school gave me a solid knowledge of OOP (C#, C++, PHP), DBMS (MySQL) and web development (HTML, CSS, JS)

CCNA Exploration: Network Fundamentals Certificate — [Cisco Networking Academy course](#) Bassano del Grappa, VI - IT

From January 2013 to May 2013

Certificate for the English language - PET (B1) — [University of Cambridge course](#) Bassano del Grappa, VI - IT

From March 2011 to April 2011
